HEALTH ALERT

CDPH is anticipating a challenging winter with respiratory viruses, including a surge in influenza, RSV, and COVID-19.

Due to the current COVID-19 universal masking mandate in health care settings, I will not be issuing a “flu vaccine or mask mandate” at this time, but Public Health is asking that you continue to encourage your staff to get their flu vaccines this year in addition to the bivalent COVID boosters now available.

If the universal masking mandate is removed prior to the end of this flu season, we do anticipate the possibility of issuing a masking mandate for unvaccinated health care personnel at that time.
