- Total surveys returned: **55 surveys (44%)**

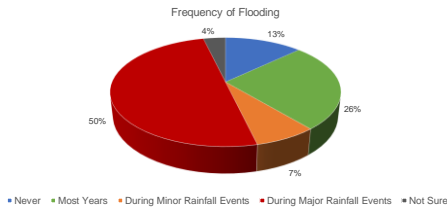

1

1. How long have you owned and/or resided on this property?

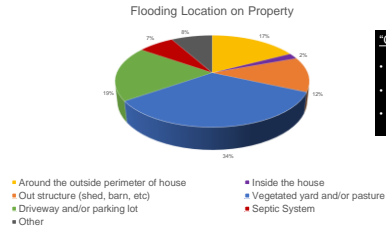

2

2. What is the frequency at which your property experiences flooding?

3

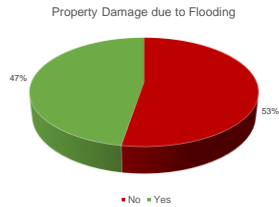

3. If you have experienced flooding on your property, describe the location on your property in which this flooding occurs:

- "Other" Responses:**
- Flood water under house
  - Drainage ditch flooding and standing water
  - Basement flooded

4

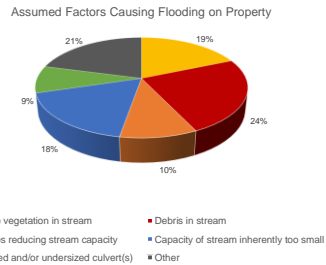

4. Has your property ever experienced damage due to flooding?

- "Other" Responses:**
- Entire house surrounded by flooded waters
  - Damaged septic tank
  - Outdoor trees and plants killed
  - Parking lot pavement was washed away
  - Destroyed electric panel of water pump
  - Had to replace insulation under house that protected furnace pipes
  - Fence was taken out
  - Undermined back porch and stairway
  - New carpet

5

5. From your perspective, what has been the cause of flooding on your property? Check all that apply.

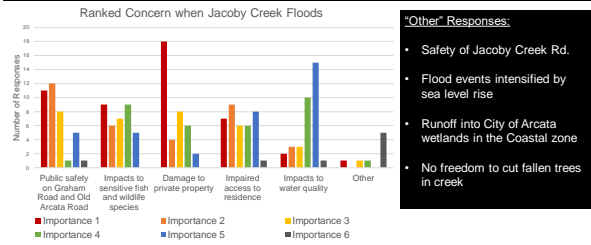

- "Other" Responses:**
- Lack of maintenance in creek
  - Uphill development and urbanization of Downtown Bayside
  - Current and historic mismanagement of the watershed
  - Increased sedimentation
  - Poor drainage
  - Lots of rain
  - High rainfall, snowmelt, and high tide at the same time
  - Natural process
