Fire Hazard Severity Zones (2008)

- Moderate
- High
- Very High

Townships
Section Lines

- H01 - Perennial Shoreline
- H11 - Perennial Stream or River
- H12 - Intermittent Stream or River
- H21 - Perennial Canal, Ditch or Aqueduct
- H31 - Perennial Lake or Pond
- H32 - Intermittent Lake or Pond
- Waterbodies

Abstract from fhaz08_3 Metadata:
Fire Hazard Severity Zones ADOPTED, 11-7-2007, SRA only
Abstract: PRC 4201 - 4204 and Govt. Code 51175-59 direct the California Department of Forestry and Fire Protection (CAL FIRE) to map areas of significant fire hazards based on fuels, terrain, weather, and other relevant factors. These zones, referred to as Fire Hazard Severity Zones (FHSZ), define the application of various mitigation strategies to reduce risk associated with wildland fires. CAL FIRE is remapping Fire Hazard Severity Zones (FHSZ) for State Responsibility Areas (SRA) and Very High Fire Hazard Severity Zones (VHFHSZ) recommendations in Local Responsibility Areas (LRA) to provide updated map zones, based on new data, science, and technology. This specific dataset is used to create the official "Maps of Fire Hazard Severity Zones in the State Responsibility Area of California" as required by Public Resources Code 4201-4204 and entered in the California Code of Regulation, Title 14, Section 1280 Fire Hazard Severity Zones, and as adopted by CAL FIRE on November 7, 2007. Maps of the adopted zones in SRA are available at: <http://map.cdf.ca.gov/projects/hazard/haz08.html>
More information about the project can be found at: <http://map.cdf.ca.gov/projects/hazard/haz08.html>
